GRADO - ITALY

GRADO. THE COLOURS ENCHANTMENT

Sun, sea, exciting nature, this is "The island of the sun" with a cocktail of panoramic beauty, history, a beach life

and enjoyment that makes

Grado one of the most sought after international tourist resorts. Grado is visited mainly for its cuisine, the possibility of choosing from hundreds of kinds of sports activities, the pleasure of taking part in important exhibitions and manifestations.

But we must not forget its

thermal resorts, with marine cures that reach incomparable results in terms of the characteristics of the beach and the favourable exposure to the south.

This enchanting island is a safe and tranquil paradise for

families on holiday or for youngsters who are looking for amusement. Made up of large pedestrian areas immersed in greenery, it has

In this picture among "calles" and "campiellos" we can discover the historical

town centre, with the Dome and Baptistery that remind us of the Aquileia Basilica which is not very far away, the heart of a buried metropolis, with its archaeological excavations and museums which can be visited. Its history intertwines and enhances our holidays in a special way.
